

UTTR ANTENNA TOWERS VARIOUS LOCATIONS, UTAH

PROJECT COMPLETION
2010

CLIENT

Utah Test & Training Range (UTTR)
thru System Planning Corporation

PROJECT DESCRIPTION

This project consisted of the design, fabrication and installation of 3 antenna towers at remote locations.

PROJECT FEATURES

- Provided complete engineering and design drawings sufficient to obtain permit from UTTR
- Custom monopole towers (galvanized carbon steel) with non-metallic (fiberglass) antenna support structures
- Managed all fabrication and construction efforts, including excavation, concrete foundations and tower installation
- Finished project on schedule and on budget
